

STUDI KASUS 10

A publishing company produces scientific books on various subjects.

The books are written by authors who specialize in one particular subject.

The company employs editors who, not necessarily being specialists in a particular area, each take sole responsibility for editing one or more publications.

A publication covers essentially one of the specialist subjects and is normally written by a single author.

When writing a particular book, each author works with an editor, but may submit another work for publication to be supervised by other editors.

To improve their competitiveness, the company tries to employ a variety of authors, more than one author being a specialist in a particular subject.
